THESIS & RISKS (edit freely)

+ India's #2 telco with the highest ARPU (₹264 in Q1 FY27) and record postpaid adds; premium mix keeps improving.
+ Next tariff hike (expected H2 FY27 / early CY2027) flows mostly to margin (lever: ARPU growth).
+ Capex intensity falling after the 5G build-out; strong free cash flow is cutting net debt.
+ Higher Africa stake (~79% from Jun-2026) and Homes / Business / data centres add growth.
– Tariff hikes could be delayed again (June 2026: put off amid high inflation) or diluted by competition.
– Africa currency devaluations and Jio's IPO / pricing moves are key swing factors (lever: Africa FX).

HOW TO USE

1. Assumptions tab: pick Base / Bull / Bear and edit yellow cells. Blue = input, black = formula, green = link to another tab.
2. Hover over blue inputs for sources. Anything marked ESTIMATE should be replaced from the FY26 Annual Report. Leases are treated as debt.
3. Tabs flow left to right: Assumptions → Revenue_Costs → Schedules → Financials → Valuation → Dashboard.
4. For education and analysis only – not investment advice.
